

Turn queues into orders.

The **Ordelleo K27** is a 27-inch freestanding self-ordering kiosk engineered for QSR — payments, printing and scanning built in, running Ordelleo out of the box and integrating with the POS you already have.

27" PCAP touchscreen

Full HD 1080 × 1920 portrait, 300 nits, 10-point multi-touch behind edge-to-edge glass.

PAX IM30 payment bay

A dedicated recess for the unattended terminal — international cards and wallets, plus local schemes.

80 mm receipt printer

Fast front-loading thermal printer on a slide-out tray, so a roll change takes seconds.

1D / 2D scanner

Reads loyalty cards, coupons and app QR codes straight off a guest's phone screen.

Bilingual ordering UI

Arabic and English out of the box, themed end-to-end to your concept.

Freestanding floor stand

Pole-mounted on a slim base, single- or double-sided. Wall-mount available.

POS INTEGRATION

Works with Aloha / NCR Voyix and the other major platforms. Menu sync, order injection and kitchen routing — the POS stays the source of truth.

PAYMENTS BY MARKET

The PAX IM30 bay runs fully unattended and takes the rails your market uses — international cards and wallets everywhere, plus local schemes like mada and Benefit.

BUILT FOR UPTIME

Fanless Intel compute, tool-free service access behind lockable doors, remote monitoring and a 15-month warranty.

Specifications

Model reference **GD27C3** · deployed worldwide, with acquirer and language support certified per market.

DISPLAY & TOUCH

Screen	27" LCD, portrait
Resolution	1080 × 1920 Full HD
Brightness	300 nits
